

Aura Lighting

Design welcoming, cozy spaces that invite as daylight fades with Aura! Aura seamlessly integrates with any Structureworks design, streamlining the coordination process and eliminating additional specifications. The 12 or 24 volt system can be easily connected by any crew responsible for installing the structure.

- Easy to install connections with terminated plug wires.
- Safe, low voltage system that doesn't require an electrician for installation
- All fixtures produce a warm white light
- Designed for extreme outdoor environments
- Two-year limited warranty
